What's the problem? Reporting damaged signs is a serious issue and currently takes too long to do.

- Online forms take a lot of time to fill out.
- Most online forms ask for unnecessary or personal information.
- By the time you have access to a computer, you might have forgotten.
- Providing the exact location of the sign is an issue.
- Some places might require a person to go to the authorities.

Why Sign Whine?

- Damaged street signs are visible in almost every urban community.
- Ordinary residents are more likely to report such signs if the method is more feasible.
- Some signs go unnoticed and it takes a severe accident to draw attention to it.

Our Proposed Solution: Allow users to report deteriorated or vandalized street, urban, and highway signs.

- A more developed website with active users.
- Sign Whine encourages the public to be more aware of their surroundings.
- Its goal is to also speed up the current process by cutting down on online forms and phone calls.
- Having every city’s public works personnel respond to their local resident’s reports.
- Sign Whine will completely change the way a person can report a damaged or vandalized sign.
